Here is a list of available custom products and some samples:

Race Plaques

Sports Memory Mates

Greeting Cards (Horizontal and Vertical)

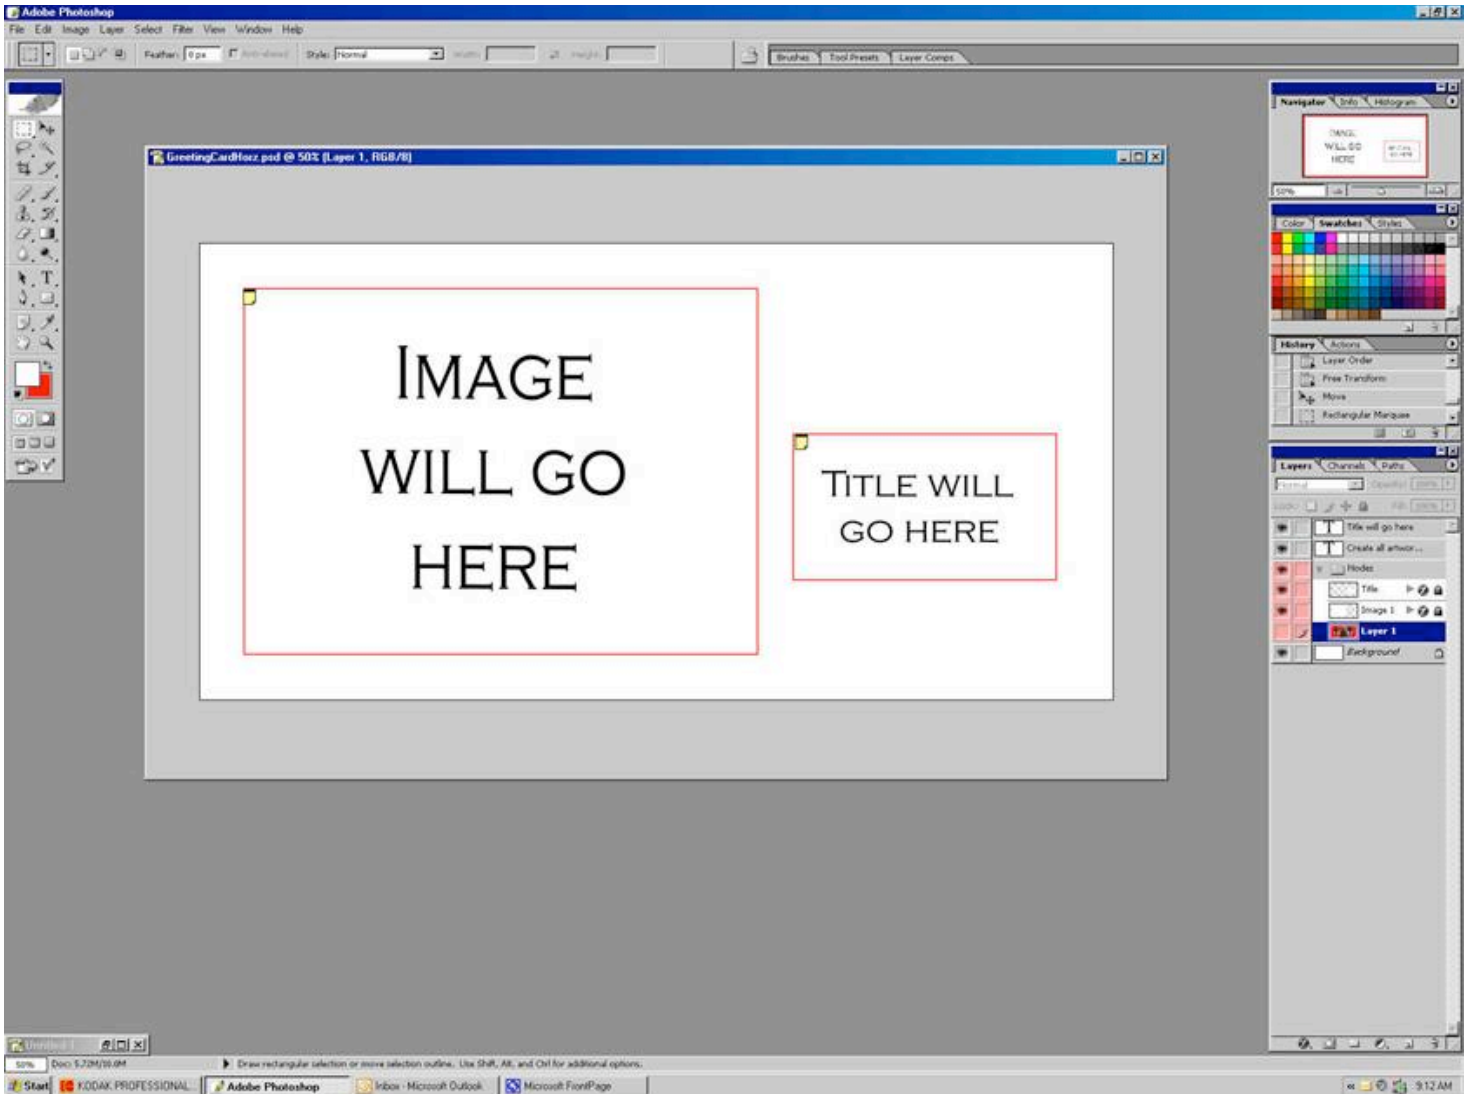

Co-branded prints(5x7 and 8x10 horizontal and vertical)

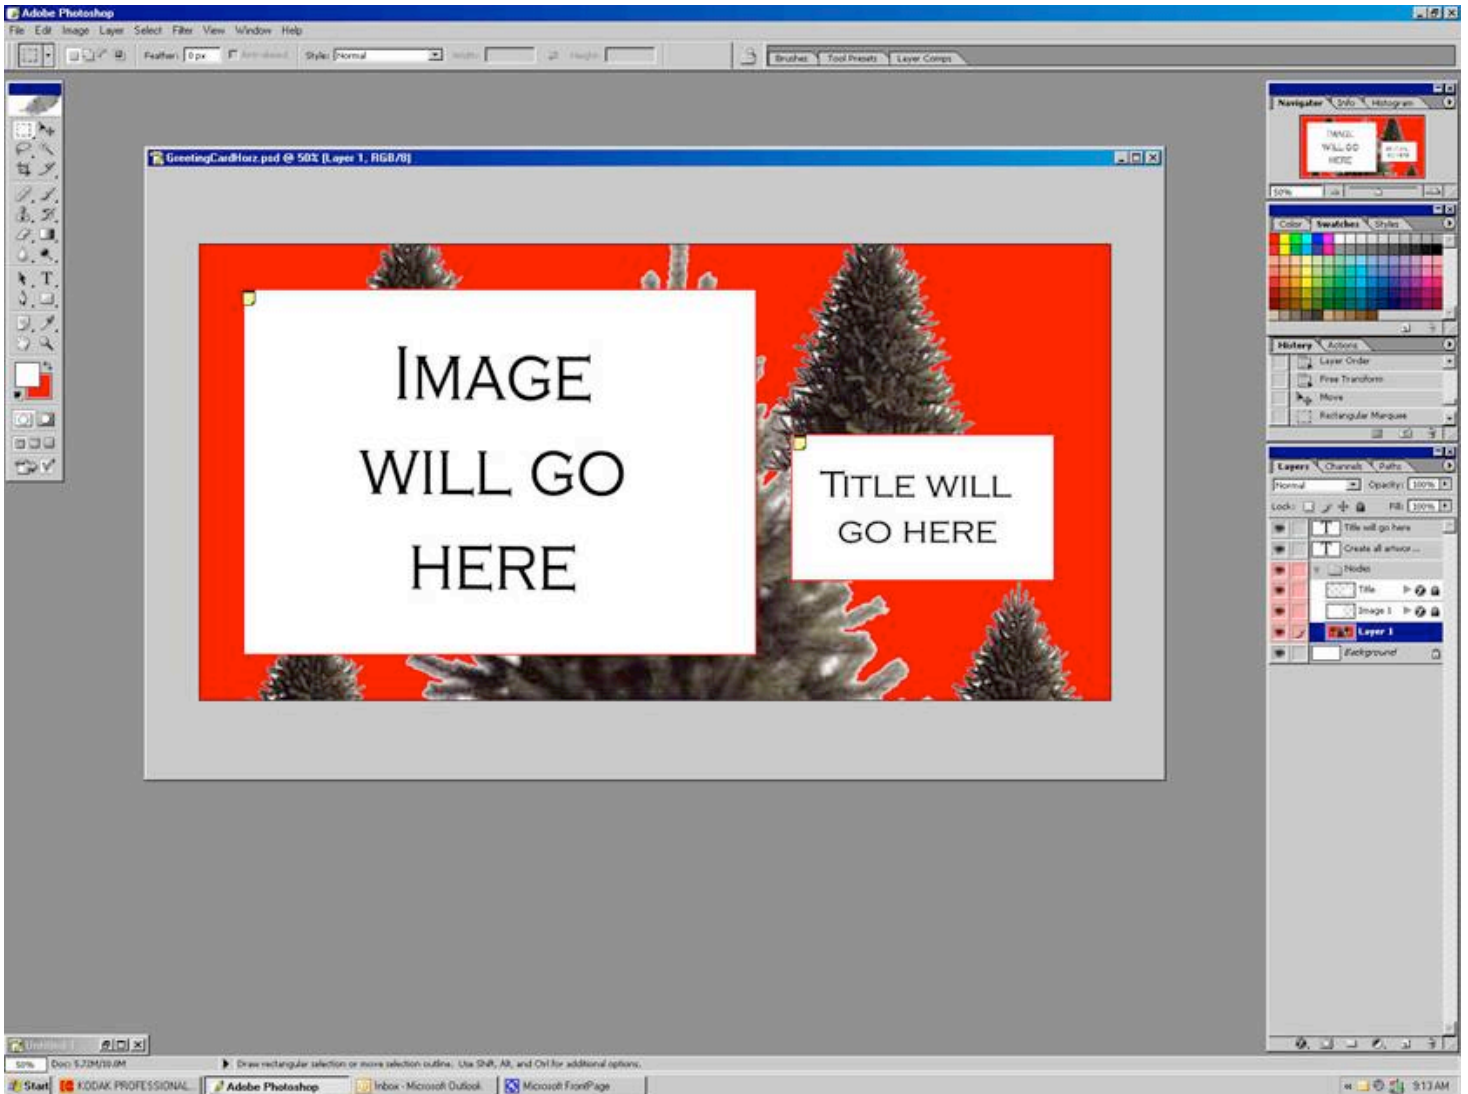

How to create custom products

Open the custom template of the product to be used in Photoshop. Note files are attached to each area defining what will be placed in the area.

Add your custom graphics to the area designated for graphics. You may want to create a horizontal and a vertical design.

Flatten and save image as a .jpg of maximum quality.

FTP the .jpg files to a QP2 event. It may be wise to upload to the same event you plan on offering custom products. This will keep the custom jpg files from expiring at a different time as the images being offered.

Create a package within the event for the type of product. Check the box for a custom product modifier. Check normal modifiers and they will be ignored. Save changes.

Type order number, roll and frame (image name) of custom jpg background. Assign an image to the vertical and horizontal choices even if you are only offering one of the orientations.

The screenshot shows a web browser window displaying a management interface. At the top, there is a navigation menu with buttons for Main, Setup New Event, Package Management, Passwords, Gift Certificates, Shipping, Markets, Users, Reports, Group Permissions, Batch Management, Refouch Pricing, Taxes, and Logout. The main heading is "Custom Product Background Management". Below this, there is a link for "Back to Event Management". The interface is divided into two sections: "Horizontal Images" and "Vertical Images". Each section contains a list of items: "20 custom Greeting Cards" and "20 Holiday Greeting Cards". Below the lists, there are two identical form areas. Each form has three input fields: "Order" with the value "26125537", "Roll" with the value "00002", and "Frame" with the value "trees". To the right of each form is a small thumbnail image of a greeting card. A "Save Changes" button is located below the forms. A large, italicized text overlay reads: "Type order number, roll and frame number of jpg image". The browser's address bar shows the URL: "http://isp2admin.patypics.com/ver2/admin/CustomBackgrounds.aspx?eventID=207136". The taskbar at the bottom shows several open applications: Start, KODAK PROFESSIONAL, Adobe Photoshop - [Untitled], Inbox - Microsoft Outlook, Microsoft FrontPage - C:\, My Webs, and Custom Background I... The system tray shows the time as 10:21 AM.

When ordering these greeting cards the custom background will be used and the image will fill the image area and the 3 line caption will be editable at the time of ordering.
