

BLANK Perforated Flyer Envelopes!

Blank Perforated
Flyer Envelopes
Code#9110
\$33/Pkg. of 500

What a great idea! We've been asked to take our current Digital Sports Envelope Design and to create some BLANK FLYER ENVELOPES that can be used FOR ANY MARKET! We've had customers saying they can't wait to use these for DAYCARES, PARTY PICS, ETC. The possibilities are really endless! The perforated/glue strip design has been very popular, as the flyer can be detached from the envelopes.

We have some CCS Customers using the flyer part to show packages, which their customer keeps as a record of their order, then they use the envelope part to obtain the customer's information and actual order. --OR-- you can make the flyer part the order form, use the envelope as a mailing device, and the customer encloses their order form and check and mails it direct to you in this envelope. Remember too, with these BLANK Flyer Envelopes, you will also have the FULL BACK SIDE to feature your products you wish to offer to that market. It's flexible to any market!

The BLANK Flyer Envelopes will already be glued and folded and left open flat for overprinting on both sides. The whole piece (including flyer, glue strip and envelope) is 12-3/4" X 8-1/2" but you must allow about 3/4" in the middle of the glued side where no type can be printed. The envelope itself will be 8-1/2" wide X 3-3/4" tall once the top flyer part is torn off. You can overprint whatever you want on either side---it's up to you! You can customize these for any market, either by printing them off your laser printing or by taking them locally to be overprinted. We have had some customers that can't laserprint on them, and some can. We suggest getting some samples of our current sports envelope, and testing them before you purchase these....they are the same envelope, except with printing. You can get some sports envelope samples by calling X270 at CCS. These envelopes are a special type of envelope that not that many presses can produce. By converting them and leaving them blank for you to overprint--we give you a great cost on them due to the volume we produce for everyone, and then you take it from there for overprinting!

****PLEASE NOTE!!! We will be producing these twice a year (every 6 months), so you will need to estimate your needs for the months of March '06-August '06. We will NOT be inventorying these, so you must order what you need for this time period!! DEADLINE for ordering is Wednesday, February 8th, 2006, 5PM (CST).**
